MUNNAM SATEESH

Software Engineer / Full Stack Java Developer

Email: munnamsateesh3@gmail.com **Phone:** +91 7675811508 **Location:** Hyderabad, India **LinkedIn** **GitHub**

PROFESSIONAL SUMMARY

Skilled Full Stack Java Developer with 4 years of experience involved in all stages of the Software Development Life Cycle (SDLC). Demonstrated expertise in engineering scalable microservices, secure backend RESTful APIs, and modern responsive user interfaces using Java, Spring Boot, React, and Vue.js. Hands-on experience in AWS cloud services, automated unit testing, AI integration, and enterprise application delivery in Agile environments.

TECHNICAL SKILLS & TOOLS

Languages & Core:	Java (Core Java, Java 17, Java 8), J2EE, OOPS, TypeScript, JavaScript, C#
Backend & Frameworks:	Spring Boot, Spring MVC, Spring Data JPA, Hibernate, JDBC, Microservices, REST APIs, Node.js
Frontend:	React, React JS, Vue.js (Vue 3), Tailwind CSS, Vite, HTML5, CSS3
Databases & Cloud:	MySQL, PostgreSQL, Oracle, MongoDB, AWS (EC2, S3, CloudWatch, Cognito), Docker
Testing & Tools:	JUnit, Vitest, Playwright/FitNesse exposure, Selenium, SonarQube, Git, GitHub Actions, Jira, Agile/Scrum

WORK EXPERIENCE

Software Engineer / Java Developer — 03/2023 - Present

INU Technologies | Hyderabad, India

- Working as a Java Developer for **Florida Power & Light (FPL)**, actively involved in the complete SDLC from analyzing business requirements to production deployment.
- Developing, enhancing, and maintaining Java-based applications, scalable microservices, and REST APIs using **Core Java, J2EE, Spring Boot**, and JPA/Hibernate.
- Collaborating with business stakeholders, QA, and cross-functional development teams in Agile/Scrum ceremonies to ensure seamless feature delivery.
- Leveraging **AI-assisted tools** for efficient development, debugging, and test-case generation, and actively working on internal AI product development workflows.
- Extensively utilizing **Jira** for task tracking and defect management, consistently involved in root-cause analysis and fixing application bugs and errors.
- Taking ownership of **code reviews** for junior resources, mentoring team members, and interviewing freshers for Java openings.
- Actively involved in AWS cloud deployment and monitoring, managing code through GitHub/Bitbucket, and actively using **GitHub Actions** to deploy code changes continuously.
- Developing and supporting dynamic UI changes and integrations utilizing React and Vue.js.

WORK EXPERIENCE (CONTINUED)

Full Stack Developer — 08/2022 - 12/2022

AvenData Technologies | Hyderabad, India

- Built MVC web applications and optimized relational database queries and centralized schema structures.
- Engineered automated testing scripts using Selenium with C# to ensure end-to-end quality and minimize regression defects.
- Performed data parsing tasks, bug troubleshooting, root-cause analysis, and system reporting.

KEY PROJECTS

Internal Product: AI Resume Intelligence Platform — INU Technology

Tech Stack: React, TypeScript, Node.js, Express, MongoDB, Drizzle ORM, Azure OpenAI, Tailwind CSS

- Designed full-stack recruitment automation solution to streamline candidate parsing, matching, and duplicate detection.
- Integrated Azure OpenAI for automated semantic resume analysis and intelligent job description matching.
- Implemented secure SSO authentication and type-safe database access via Drizzle ORM and MongoDB.
- Created high-throughput bulk resume ingestion pipelines and interactive candidate analytics dashboards.

Project 4: Assist Portal - Florida Power & Light (FPL) — 06/2025 - Present

Tech Stack: Java 17, Spring Boot, React / Vue.js 3, PostgreSQL, Spring Data JPA, AWS, JUnit

- Architected and developed scalable RESTful microservices with Java 17 and Spring Boot to handle assistance program workflows.
- Implemented transactional CRUD operations and database persistence using Spring Data JPA and PostgreSQL.
- Consumed SAP OData services and enforced robust authentication using AWS Cognito User Pools.
- Integrated AWS Secrets Manager and CloudWatch for secure credential handling and distributed logging.

Project 3: Streetlight Management Portal - FPL — 12/2024 - 06/2025

Tech Stack: Java 17, Spring Boot, Vue.js 3, AWS, Splunk, JUnit, Vitest

- Designed REST APIs and user interfaces for streetlight outage reporting, installation requests, and repair tracking.
- Implemented centralized logging and proactive monitoring via AWS Splunk, reducing mean time to resolution (MTTR).

Project 2: Medical Essential Service Program (MESP) - FPL — 06/2024 - 12/2024

Tech Stack: Java 17, Spring Boot, Vue.js 3, Oracle, AWS, Splunk, JUnit

- Developed critical backend services ensuring 24/7 reliability for medical-essential utility customer accounts.
- Configured AWS CloudWatch and Splunk for audit logging and real-time performance tracking.

Project 1: Customer Web Applications - Central Hudson Gas & Electric — 04/2023 - 06/2024

Tech Stack: ASP.NET Core, Web API, Vue.js, TypeScript, SAP OData, Jira, Bitbucket

- Managed incident resolution and continuous feature enhancements via ServiceNow and Jira in an Agile environment.
- Integrated front-end TypeScript modules with backend SAP OData services and validated data accuracy with Postman.
